Stephen Hawking warns artificial intelligence could end mankind

By Rory Cellan-Jones
Technology correspondent

02 December 2014 · Technology ·

Stephen Hawking: "Humans, who are limited by slow biological evolution, couldn't compete and would be superseded"

Big brother: China's data-driven Social Credit system :

Whether it's by Facebook, Uber or Reddit, we're all being scored without knowing how or why. But what if it's punishing us? Welcome to the future of China

Gender was misidentified in **up to 1 percent of lighter-skinned males** in a set of 385 photos.

Gender was misidentified in **up to 7 percent of lighter-skinned females** in a set of 296 photos.

The New York Times

Facial Recognition Is Accurate, if You're a White Guy

By [Steve Lohr](#)

Feb. 9, 2018

Facial recognition technology is improving by leaps and bounds. Some commercial software can now tell the gender of a person in a photograph.

When the person in the photo is a white man, the software is right 99 percent of the time.

But the darker the skin, the more errors arise — up to nearly 35 percent for images of darker skinned women, according to a new study that breaks fresh ground by measuring how the technology works on people of different races and gender.

These disparate results, calculated by Joy Buolamwini, a researcher at the M.I.T. Media Lab, show how some of the biases in the real world

Gender was misidentified in **up to 12 percent of darker-skinned males** in a set of 318 photos.

Gender was misidentified in **35 percent of darker-skinned females** in a set of 271 photos.

AI and the Future of Work

- The **on-demand economy**
- The **“everywhere workplace”**
- Changing **nature of work and jobs**

Virtual space designer

Biohacker

Trainer for autonomous cars

IoT data analyst

Focusing on Skills

Promote **STEM learning** and uniquely **human** skills

Prepare **workers** for rapidly evolving economy

Enable **lifelong training**

Create a **skills-based labor market**

We should have a voice

Conversations about

- ✓ Ethical implications of powerful new technologies
- ✓ Practical **principles** for trustworthy and human-centered AI
- ✓ Sharing of **best practices**
- ✓ Training workers
- ✓ Modernizing **social safety net**
- ✓ A **regulatory environment** that fosters AI innovation

Partnership on AI

to benefit people and society

Established to study and formulate best practices on AI technologies, to advance the public's understanding of AI, and to serve as an open platform for discussion and engagement about AI and its influences on people and society.
